WITHSTAND THE WORST.

Product data sheet

RS450FF First Aid Locker

Typical use:

For the storage of First aid Equipment on Naval Vessels including the new Type 31e Frigates for the Royal Navy. It has a NATO part number. NSN 2090-99-258-4405.

Description:

These cabinets are manufactured using Lloyds approved fire retardant composites (apart from the roller door) to provide long lasting protection for vital life-saving equipment even in the harshest environments. This is backed up with an excellent IP rating of 56. It has both Lloyds and ABS approvals.

The design ensures a high level of rigidity for the relatively low weight with a very effective EPDM seal around the door aperture. The roller shutter door enables access in confined spaces. The AS shutters used have proved to be extremely durable over a very long period of time.

The cabinet can be customised with shelves and brackets.

Standard specification:

Dimensions (mm)

Height x width x depth: 2000 x 1090 x 450

Aperture: 1530H x 902W

Internal depth: 396

Weight Kg: 35Kg

Material specification:

Colour: Green RAL 6029

Material: Lloyds approved composites with UV stabilised gelcoat

Class 1 fire retardant composites

Lettering: "FIRST AID LOCKER" 75mm white
