# MARINE CURTAINS

THE MAINSTAY OF ANY INTERIOR DESIGN

## MARINE CURTAINS

### HANDCRAFTED IMO & MED DRAPERIES

From luxurious statement pieces to functional yet attractive window dressings, we offer curtains that are both practical and aesthetically pleasing. Here at Solarglide, we understand the importance of style and functionality and make it our priority to help keep your passengers and crew comfortable and well-rested. All our boat curtains are made to measure so you can choose every aspect of your finished products. Choose your style, fabric and backing lining then let our experienced team do the rest.

Tell us the name of the fabric you are looking for and we will source it from our network of international fabric suppliers on your behalf; alternatively, if you are unsure of the fabric you would like, you can seek inspiration from the 'fabric choices' on our website. Solarglide offer the full Turnkey package, we source the fabric, we purchase the fabric, we manufacture the curtains to the exact size, specification, we deliver onboard, and we install (which is optional).

Choosing the right marine curtains for your vessel's interiors is vital to create comfort and provide passengers and crew with privacy, warmth, and light control. Solarglide's curtains are exported all around the world and can be found on cruise liners, ships, ferries, and yachts, globally.

Whether it's for cabin windows, porthole covers, or wide panoramic windows, Solarglide's range of fully customisable curtains can add style and class to your interior. When it comes to fabrics, we have something for everyone. Whether you're looking for decadent luxury or an attractive pattern to add the finishing touch, we have a range of fabrics to suit.

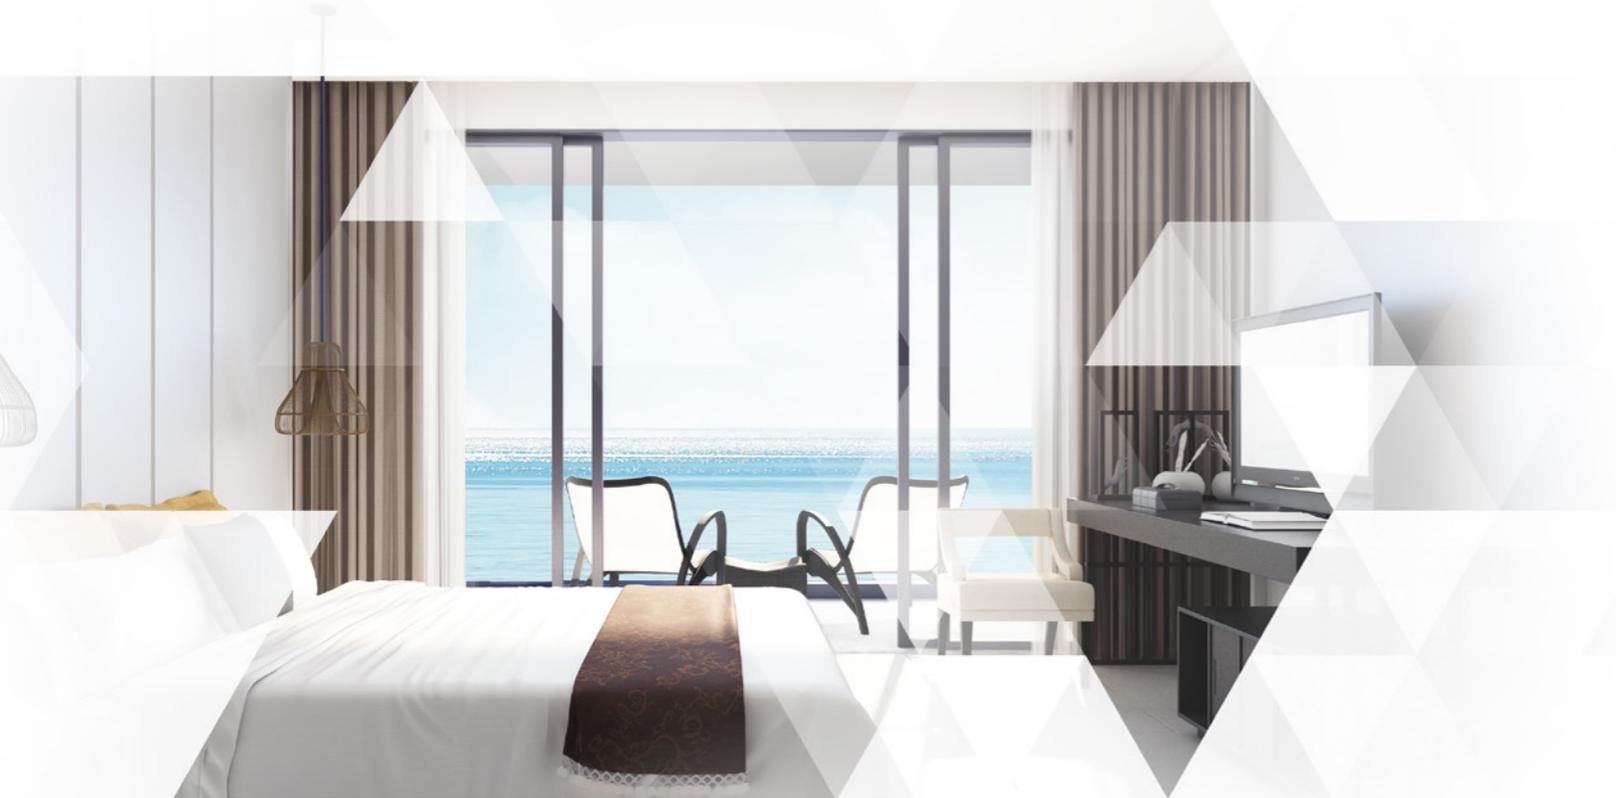

## THE IMPORTANCE OF CURTAIN FULLNESS

In the world of marine curtains, we talk about fullness. This refers to the amount of fabric used in a curtain. The more fabric used, the more fullness the curtains have. More fabric equals a richer look, more sound absorption, and more protection from light. While we offer a full range of fullness, for a luxury finish for your cabins and suites, we'd recommend 200% fullness or greater.

Talk to us about your curtain requirements and we'll give you all the options before helping you make your final decisions.

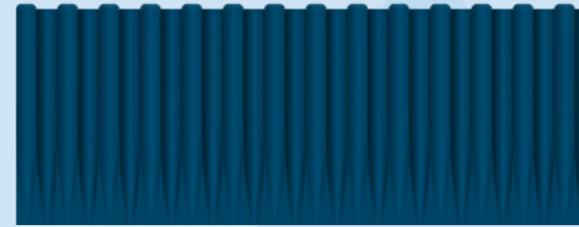

Where fabrics are not already selected by an interior designer, we'll offer you a vast array of choices including Patterned, Blackout, Velvet and Dimout.

To check out our full range of recommended fabrics visit [www.solarglide.com/products/marine-curtains](http://www.solarglide.com/products/marine-curtains)

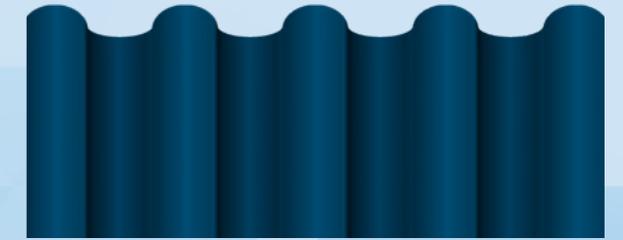

## CURTAIN HEADERS

Solarglide's marine curtains come in three distinct styles.. Choose from pencil pleat, double & triple pinch pleat, or wave.

### PENCIL PLEAT

Pencil pleat curtains look like a line of pencils when hung. The folds of the fabric are tightly gathered to create and provide a neat and pleasingly uniform look to your curtains.

### WAVE

Wave curtains have no gathering or pleating across the top. Instead, a twisting curve creates fluid folds to fall directly below the rail.

### DOUBLE PLEAT

### PINCH PLEAT

Pinch pleat curtains use a narrow, short pleat and are ideal where windows are smaller and need a more compact curtain

### TRIPLE PLEAT

## NEED MORE HELP WITH YOUR DECISION? NO PROBLEM.

We provide a range of powder coated aluminium rails. They're cut to the exact window size and are provided with an end cap and gliders. These come pre-assembled so they're easy to install.

Hooks include white plastic, rounded and metal depending on the weight and fullness of your curtain choice.

For ease of shipping, our maximum rail length is 2.8m. However, larger widths can be achieved by joining pieces with no hindrance to operation of the rails.

Manual and motorised curtain rails are available.

We have an established, strong relationship with UK and international fabric manufacturers to maintain a high quality, varied range of fabrics for our customers.

We offer the complete turnkey package with our curtains:

- Survey
- Quotation and recommendations
- Sourcing and supply of fabric
- Set of approval drawings
- Curtain manufacture
- Assembly of rails
- Preparation of fixtures, hooks and tie backs
- Biodegradable packaging
- Labelled and packed per location onboard
- Delivery onboard
- Installation (if required)

Our highly experienced team understands time critical projects.

Every one of our curtain fabrics is IMO FR tested. FR One and MED batch tested fabrics are also available upon request.

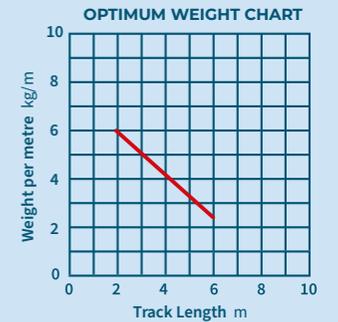

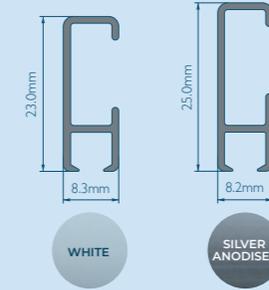

## CURTAIN RAIL & ACCESSORIES

Solarglide offer a range of curtains rails and accessories for your onboard requirements. Our team will always recommend the best solution depending up size and style of the desired curtain. Additional accessories provided by Solarglide include brackets, curtain hooks, tie off hooks and tie backs.

### PRINCIPAL H-SECTION PROFILE TRACK
