Halyard has been recognised as a leading provider of technical equipment for marine engine rooms since 1979. Today our product range extends beyond exhaust systems, for which we are renowned, to include propeller shaft systems, cranes, hatches, filtration systems, noise & vibration control equipment plus a range of other technical products.

Halyard originated as the UK distributor for **Aquadrive** - an antivibration shaft system that delivers the propeller thrust into the hull of the vessel rather than through the transmission and engine. Installing the Aquadrive dramatically reduced noise & vibration and is fully optimised with the engine being supported by softer engine mounts, reducing the transference of engine vibration to the vessels structure. Our pursuit of making boating more comfortable quickly added the supply of **Water-cooled Exhaust Silencers, Tube & Connectors, Lift Silencers & Noise Insulation** to our product portfolio reducing noise pollution & adding once again to onboard comfort.

As technical demands of our customers grew, we then added exhaust **Risers, Sprayheads, Supports & Thermal Jackets** as well as **Hoses & Bellows** so that we were able to provide a complete exhaust system. Along with this in-house **Design** capability was setup so that **Custom Parts** & systems could be provided. Working with a wider range of customers and vessel applications led us to add **Dry Silencers** to our product range.

With an increasing product portfolio, we have attracted **Distributors** from all over Europe & further afield - we now have over 30 distributors, dealers & agents worldwide.

As regulations have tightened, we have worked with established industry partners to provide exhaust **SCR & DPF** aftertreatment solutions, along with solutions to tackle overboard discharges including **Bilge Water & Grey Water**.

Our growing reputation as a distributor of technical products has added **Seatorque Shaft Systems, Freeman Hatches & Steelhead Cranes** to our distributed product line-up. We are delighted to be representing such prestigious products and are always careful to ensure that products we bring to market are aligned to our high technical and quality standards.

To ensure that we support our customers fully, we have also grown our **Service Operation** offering **Maintenance, Repair & Overhaul Support**, plus **Installation, Sea Trial & Commissioning Services**, & system **Audits**.

Exhaust Systems & Accessories

Watercooled or dry systems, standard or bespoke risers, spray heads, silencers, separators, DPF & SCR aftertreatment solutions

Standard product range:

- GRP silencers, separators, tube & connectors
- Moulded silencers & separators
- Rubber & silicone hose, bellows & connectors
- Clamps, supports & accessories

Bespoke solutions:

- Designed to meet customers requirements
- Water cooled or dry silencers
- Solutions for all high & medium speed engines
- Spray rings to DN700
- DPF & SCR solutions
- Lloyd’s Type Approvals
- Underwater exhaust outlet design

The information published by Halyard indicates the general suitability of our products for the types of applications for which they are designed. We cannot accept design responsibility for any specific installation unless we have confirmed in writing that the overall installation design is correct following our approval of detailed drawings or our physical survey of the vessel or equipment in which it will be used.

Exhaust Systems & Accessories

Halyard UK Manufacturing Facilities

Halyard products including stainless steel risers, water injection spray heads, exhaust transom outlets, supports, high temperature GRP silencers and separators, tube and connectors, marine exhaust hose, silicone hoses and bellows are designed and manufactured in-house at our UK manufacturing facilities.

As a result Halyard are uniquely placed to be able to design and manufacture market leading exhaust systems and components to meet your exact requirements.

Risers and Spray Heads

The general make-up of a riser and spray head assembly is shown below. Risers are typically bespoke and are designed and manufactured to suit the particular engine and engine room configuration. Supports and thermal jackets are normally supplied as part of the installation kit.

Parts	Description
1	Optional down angled spray head
2	Spray head with water injection connection which is installed into the exhaust hose
3	Curved stainless steel bend, used in the upper and lower sections
4	Flange connector to suit engine turbo outlet
5	Riser tube as required
6	Flange connection
7	Heat protective jackets
8	Heat protective jacket for riser tube
9	Support brackets as required

Dry Silencers

UK based IMS are global leaders in noise reduction and particulate filtering, manufacturing absorptive and reactive exhaust gas silencers, SCR and DPF emission control technology, acoustic enclosures, air inlet & extract attenuators, and acoustic doors.

Reactive Exhaust Gas Dry Silencer

This range of reactive silencers are designed primarily for use with internal combustion engine exhausts. The units can be installed vertically, horizontally or inclined, without affecting performance. They are of fully welded design, sturdily constructed in carbon steel with a heat resisting aluminium or black paint finish to ensure a long service life. All units are fitted with drain points to remove exhaust condensate. The acoustically treated MA type silencer increases the higher frequency performance by up to 10dB(A), reducing casing breakout as well as lowering the surface temperature. The units can be used where good overall acoustic performance is required without a secondary or terminal silencer.

Absorptive Exhaust Gas Dry Silencer

This range of silencers are straight through absorption type, suitable for vertical, horizontal or inclined installations. The design gives good attenuation in the higher frequency octave band-widths and is, therefore, versatile in its application as an exhaust silencer or intake silencer on internal combustion engines. When used as a secondary or terminal silencer in conjunction with a high-performance reactive silencer, stringent noise limitations can be achieved as a result of their complementary effect on the noise spectrum. They are of all welded design, sturdily constructed in carbon steel with a heat resisting aluminium or black paint finish to ensure a long service life.

Options for both reactive and absorptive silencers:

- BS10 Table 'D' flanges fitted as standard
 - Alternative flange patterns on request for example PN flanges
 - B.S.P. connections available on smaller sizes
 - Radial/axial Inlet & Outlet
 - Heat resistant aluminium or black paint
 - Shot blast and aluminium metal sprayed Stainless steel grades such as 304 / 316 available
- Corten steel
 - Support feet and brackets
 - Anti-vibration mounts
 - Lifting lugs
 - Spark arrestors
 - Thermal Insulation Jackets / Stainless Steel Cladding
 - Marine Classification Certification

The most common silencers sold by Halyard into the marine industry are the M31/MA31, M51/MA51 and FP ranges. There are, however, also the M21/MA21, M41/MA41, MRA1/MAA1, MRA2/MAA2, MRA3/MAA3, MSA & BTS ranges with different configurations and specifications available on request.

M31 Reactive Silencer Range Critical Grade Exhaust Silencers

The M31 range of semi-residential reactive silencers are a medium attenuation design recommended for use where equipment must operate with a reduced noise level. Highly efficient and of advanced acoustical design, they are suitable for the exhausts or intakes of all two-stroke and four-stroke internal combustion engines, compressors and blowers. The units can be mounted vertically, horizontally or inclined, without affecting efficiency. The M31 ‘semi-residential grade’ reactive exhaust silencer range are of all welded design, sturdily constructed in carbon steel with a heat resisting aluminium or black paint finish to ensure a long service life. All units are fitted with drain points to remove exhaust condensate.

MA31 Range is acoustically treated MA31 type silencer increases the higher frequency performance by up to 11dB(A), reducing casing breakout as well as lowering the surface temperature. The units can be used where good overall acoustic performance is required without a secondary or terminal silencer.

Drawings and dimensions are for guidance. Halyard (M&I) Ltd should be contacted to verify correct silencer for the particular application. Alternative sizes and configurations available on request.

M51 Range Critical Grade Exhaust Silencers

The M51 range of ‘critical grade’ exhaust silencers has been designed to meet the increasingly stringent noise criteria required in a pollution conscious environment. Generally specified for use on two stroke and four-stroke internal combustion engine exhausts, the units give good low frequency attenuation in the normal engine firing frequency ranges. The units can be installed horizontally, vertically or inclined, without affecting efficiency. The M51 ‘residential grade’ reactive exhaust silencer range are of all welded design, sturdily constructed in carbon steel with a heat resisting aluminium or black paint finish to ensure a long service life. All units are fitted with drain points to remove exhaust condensate.

The acoustically treated MA51 type silencer increases the higher frequency performance by up to 13dB(A), reducing casing breakout as well as lowering the surface temperature. The units can be used where good overall acoustic performance is required without a secondary or terminal silencer.

FP Range Straight Through Absorption Silencers

The FP series silencer is a straight through absorption type, suitable for vertical and horizontal installations. The design gives good attenuation in the higher frequency octave band widths and is, therefore, versatile in its application as an intake or exhaust silencer on fan blowers, centrifugal compressors, internal combustion engines, and small low-pressure gas vents and steam ejectors. When used as a secondary or terminal silencer in conjunction with a high performance reactive silencer, stringent noise limitations can be achieved as a result of their complementary effect on the noise spectrum. The FP ‘industrial grade’ absorptive

silencer series are of all welded design, sturdily constructed in carbon steel with a heat resisting aluminium or black paint finish to ensure a long service life.

SCR and DPF Aftertreatment Systems

Customer requirements and vessel machinery spaces are many and varied. These range from the need to meet statutory emissions regulations, through to the requirement to eliminate soot from blemishing the deck of a luxury yacht. Along with this there is often the need to engineer the solution to make best use of a restricted space. Whether for a commercial vessel or superyacht, new build or retrofit Halyard can propose a solution optimised for reliability, control and efficiency.

Halyard work with industry leading companies including Emigreen, Xeamos, and IMS to provide the most suitable, optimised system for each project.

Please contact Halyard for further information and to discuss your specific requirements.

Exhaust Systems & Accessories

Exhaust Alert System

Water Cooled Exhaust Overheat Alert System

- IP67 waterproof 52mm gauge
- Self test functionality
- Touch screen control
- Single and twin engine monitoring
- Single and dual station display
- Easy installation
- Fail-safe functionality

Halyard's Exhaust Alert provides a class leading exhaust overheat alert system housed in a stylish new standard 52mm diameter, IP67 waterproof gauge.

The new system incorporates self-test functionality with touch screen control and is supplied as a 12/24 dual voltage unit. Available with a choice of chrome or black bezel and black or white gauge faces to compliment your existing gauges.

Exhaust Alert - Gauge System

Part No.	Reference	Exhaust Alert System
Sets		
H021248	AS125	Single engine single station gauge display with removable through hose sensor with 16 metre cable
H021250	AS145	Single engine dual station gauge displays with removable through hose sensors with 16 metre cable
H021252	AS225	Twin engine single station gauge displays with removable through hose sensors with 16 metre cable
H021254	AS245	Twin engine dual station gauges with removable through hose sensors with 16 metre cable
H020170	AS701	Master display suitable for 1-2 engines, 52mm diameter gauge with white card and Chrome bezel
H020171	AS702	Repeater display to be used in conjunction with master display for a second station

Bespoke Design & Manufacturing

Customer requirements and vessel machinery spaces are many and varied. These range from the need to meet statutory emissions regulations, through to the requirement to eliminate soot from blemishing the deck of a luxury yacht. Along with this there is often the need to engineer the solution to make best use of a restricted space. Whether for a commercial vessel or superyacht, new build or retrofit Halyard can propose a solution optimised for reliability, control and efficiency.

Halyard work with industry leading companies including Emigreen, Xeamos, and IMS to provide the most suitable, optimised system for each project.

Please contact Halyard for further information and to discuss your specific requirements.

All Halyard components are produced following ISO 9001:2015 processes, and ensuring Classification Society compliance as required.

The design and manufacturing stages include:

- System general arrangement 3D model
- Back pressures and safety considerations
- Silencer attenuation, and the way this fits to the overall objective
- Exhaust pipe runs
- Water injection spray ring design and positioning
- Water separation on generator systems
- Bypasses where below water outlets are involved
- Underwater exhaust outlet design
- Silencers, separators and connections
- Supports and mounts
- Bellows and hoses
- Thermal insulation
- SCR / DPF aftertreatment systems
- Customer approval
- Creation of manufacturing drawings
- Halyard in-house manufacture and procurement of all system components

MS4000 Series Water Separator

Halyard's exhaust water separator range is available with inlet / outlet diameters from 38mm (1.5") to 76mm (3"). Manufactured from a special high temperature Polyolefin and available from stock.

MS4020 38mm 90° Outlet
MS4025 40mm 90° Outlet
Exhaust: 38mm and 40mm
Gas Outlet: 38mm and 40mm
Maximum Water Flow: 18 Litres Per Minute
Weight: 1kg

MS5000 Series Water Separator

MS5020 45mm and 50mm 90° Outlet
Exhaust: 45mm and 50mm
Gas Outlet: 50mm
Maximum Water Flow: 42 Litres Per Minute
Weight: 1.7kg

MS5010 50mm Straight Outlet
MS5025 50mm 90° Outlet
Exhaust: 50mm
Gas Outlet: 50mm
Maximum Water Flow: 42 Litres Per Minute
Weight: 1.7kg

MS5015 60mm and 63.5mm Straight Outlet
MS5030 60mm and 63.5mm 90° Outlet
Exhaust: 60mm and 63.5mm
Gas Outlet: 50mm
Maximum Water Flow: 42 Litres Per Minute
Weight: 1.7kg

MS7000 Series Water Separator

MS7510 76mm 90° Outlet
Exhaust: 76mm
Gas Outlet: 76mm
Maximum Water Flow: 65 Litres Per Minute
Weight: 3.3kg

Drawings and dimensions are for guidance. Alternative sizes and up to 1000mm O.D. configurations available on request.

Diameters from 2" to 24" are supplied with peel-ply wrapping - a special layer which the customer peels off to leave a coarse surface requiring minimal preparation.

Lloyd's Approved resins with special temperature ratings are used in the manufacture of this tube (applies to tube over 2" / 51mm only).

Part numbers H000526 – H000530, do not have Lloyd's Approval.

Note: Lloyd's Type Approval is applicable for Halyard GRP products in exhaust system applications.

Exhaust Systems & Accessories

Bronze Siphon Breakers

This range of siphon breakers are made from corrosion resistant bronze.

The siphon permits air to enter, but does not permit air and odours to escape. The cap is threaded 1/2" NPT to accept a barb fitting to facilitate overboard venting. Overboard venting is required if used in an exhaust system.

Vented loops assure clog-free anti-siphon protection for sanitation or engine exhaust systems. The oversized vent valve can easily be removed for inspection or cleaning.

Separator Non-Return Valves

Designed for use where there is a risk of water being pushed back up the separator drain or other vessel equipment.

Separator Non-Return Valves			
Part No.	Reference	Inlet/Outlet Dia. inch	Inlet/Outlet Dia. mm
H008743	NRV38	1 1/2	38
H008744	NRV50	2	51

Note: When part of an overboard system valves must not be installed below the waterline.

Thermal Insulation Jackets

Thermal insulation jackets can be supplied to suit your new exhaust system or can also be made and supplied as replacements for your existing system.

These are available with either a grey or black finish.

Carbon Fibre Halyard 'Heatshell' is also an option for certain systems.

Hot Lag

Hot Lag		
Part No.	Reference	Description
H000532	HTL05090	5m x 100mm wide, 6mm thick

Hot lag is designed for lagging hot exhaust systems with a thermal insulator which is asbestos free. It has a nominal width of 100mm (4") by 5mm (1/2") and may be held in place with stainless steel wire or hose clamps.

Replacement Exhaust System Risers, Spray Heads & Manifolds

316L Stainless Steel OEM Replacement Exhaust Injection Elbows

Suitable for both normally aspirated and turbocharged installations

- Replacement for OEM units: Ford Sabre, Ford Mermaid, Ford Lehman, Perkins, Perkins Sabre, Cummins, Volvo Penta, Yanmar etc.
- Electro or mirror polished to customer requirements
- Price on application
- Thermal jackets also available
- May require original unit as pattern

Replacement Water Jacketed Manifolds

To suit normally aspirated and turbo installations mild steel or stainless steel water jacketed hot aluminium sprayed

- Replacement for OEM units including: Ford Sabre, Ford Mermaid, Ford Lehman, Perkins, Perkins Sabre and others on request
- Price on application
- May require original unit as pattern

Rubber Design
vibration and noise control

Antivibration Mounts, Flanged Bellows & Bulkhead Penetrations

- Significant reduction of vibration into the vessel structure from the engine including through the exhaust system
- Specification and design support to ensure correctly specified and efficient systems
- Over 40 years of experience in vibration, noise, and shock control

Halyard is a preferred supplier for Rubber Design products

Mounts, Bellows & Bulkhead Penetrations

Hanging/Standing Fixed Point and Stabiliser Mounts

Rubber Design are global leaders in noise, vibration and shock control solutions for the worldwide marine market. Halyard is an authorised reseller of Rubber Design antivibration exhaust equipment. Halyard have a long-standing partnership with Rubber Design utilizing their products in Halyard exhaust systems and other applications. We can also offer these as standalone products to meet customer requirements.

Noise and Vibration Reduction

A significant reduction in the radiated noise and vibrations can be achieved by using rubber-metal elements between the exhaust gas system and ships structure. This is because the transmission speed of sound through rubber is only 45 to 90m/sec, while it is around 5000m/sec through steel. With a smart design and using rubber-metal elements a reduction of 8 to 10dB (A) can be obtained across the majority of the frequency range of 63 to 4000Hz.

Types of Mounting

For exhaust systems, two basic types of mountings are used, hanging/standing fixed support mountings and stabiliser mountings. The fixed support mountings take the static and dynamic forces and determine the direction of the expansion in the exhaust system. The stabiliser mountings guides the thermal expansion caused by the high temperature of the exhaust to the applied stainless steel bellows in the exhaust system. the stabiliser mountings also support the weight of the pipe.

Thermal Insulation

It is important to protect the rubber from the high temperature of the exhaust system. To obtain a long life time of the mountings the temperature must be below 80°C. To achieve this our fixed supports are equipped with suitable thermal insulators. By using this material, as well as providing a minimum air gap

of 25mm between the exhaust mounting and the outside exhaust insulation, the temperature can be controlled to around 50°C. The above is applicable for the flexible fixed points, for the stabilisers the thermal insulation is attained by the length of the threaded rod. For more details refer to the installation instructions.

Mounting Selection

Generally these products are part of a complete system, therefore it is advisable to seek expert advice from our engineering team. Halyard, with the support from Rubber Design, can take total responsibility for the complete design including the vibration calculations of the flexible suspended exhaust systems. Besides flexible exhaust supports, Rubber Design also produce stainless steel bellows, flexible fire proof and/or watertight bulkhead penetrations, funnel deck passages. All according to the latest design standards and regulations. With the best design and products a maximum reduction of vibrations and life span of your exhaust gas system will be achieved.

Fixed Point Mounts

Hanging fixed points are mainly used to support horizontal exhaust pipes, isolate the engine vibrations and control the dynamic forces which occur while the vessel is in operation. Besides this they determine the direction of the expansion due to thermal growth of the exhaust pipe. The fixed points can also be installed close to the engine outlet to avoid thermal expansion from the exhaust system towards the engine bellows. This to protect the turbo against external forces from the exhaust system.

Mounts, Bellows & Bulkhead Penetrations

Stabiliser Mounts

Stabilisers are mainly used to support horizontal exhaust pipes as well as stabilizing the vertical pipes and components like silencers, aftertreatment SCR or DPF units, etc. They isolate the engine vibrations and control the dynamic forces which occur while the vessel is in operation. Besides this they guide the direction of the expansion due to thermal growth of the exhaust system.

MP2 Series Compression Mounts

The MP-mountings (Multi Purpose) are developed to offer excellent passive and active vibration isolation for various applications.

Next to offering excellent isolation the MP-mountings internal deflection limiter avoids overload and allows use for mobile applications on for example trucks and ships. The geometry of the metal top offers protection to the natural rubber against oil and ozone. Also available in stainless steel.

Typical applications:

- Generators
- Engines
- Fans
- AC-units
- Cooling equipment
- Electro motors
- Cabinets

Mounts, Bellows & Bulkhead Penetrations

Flanged Rubber Bellows

Rubber Design rubber bellows red ring are made from EPDM rubber and provide resistance to water up to 90°C, however this is influenced by the working pressure.

Rubber bellows with flanges have a special flow assisting convoluted shape of the bellows which minimize detrimental turbulence of the medium and pressure loss. High tensile strength texture cord plies combined with proven synthetic rubber mixes guarantee maximum reliability and an extended working life.

The rubber bellows are produced with a vulcanized steel ring to guarantee a perfect sealing of the profiled sealing rings in the special chamber of the swivel flanges. Average installed insulation is about 25dB, a figure which is further improved by compressed installation.

Alternative specification bellows including yellow ring single and double are available, contact Halyard for details

Pressure

The maximum working pressure is 16Bar (10Bar*) with a test pressure of 25Bar and even a burst pressure of over 60Bar (30Bar*)

(*For bellows larger than NB150)

Standard flange range made of carbon steel S235JR, drilled according to DIN PN10/16, electrolytic galvanised												

Heat Reducing Bulkhead Penetration

Heat reducing penetrations are fixed penetrations designed to insulate the high exhaust temperature to bulkheads or decks. The complete assembled penetrations are made of carbon steel flanges and special asbestos free insulation material, ready for installation. Alternative materials for the carbon steel flanges can be supplied on request.

Flexible deck and bulkhead penetrations are also available, contact Halyard for details.

The penetrations are available as standard with the following dimensions.

Cast Hatches & Watertight Doors

Freeman Hatches, Doors & Portlights deliver reliability, safety and more features than any other manufacturer

Cast Hatches:

- High quality range of cast Aluminium and Ductile Iron hatches
- Handle is always attached and fits flush with the deck
- Quick-acting dogs eliminates over or under tightening
- Versatile installation, hatches can be installed in steel, aluminium, wood, or fibreglass decks

Quick Availability Doors:

- Selection of watertight and weathertight doors
- Stock items, ready to ship
- Guaranteed quality products
- Hinged and sliding

Halyard is the Distributor for Advantec and Freeman for UK & Ireland

Series 2400 Cast Hatches

Approvals & Certificates - ISO 9001:2015

Halyard Quality Policy Statement

- Consistently meet or exceed our customer's expectation for product quality and performance.
- Consistently meet or exceed our customer's expectation for product and service delivery.
- Continuously improve our processes and systems.
- Provide employee training to better serve our customers and to support personal growth.

Certificates and Acceptances

AdvanTec's Freeman cast hatch line has various approvals and certifications. The hatches have been granted American Bureau of Shipping (ABS) Product Design Assessment Certification for 109 different models. Each of these models can be used on a number of ABS classed vessels in locations specified in the design assessment.

AdvanTec Marine constantly monitors maritime regulations, standards and classification society activities related to closure approvals.

AdvanTec Marine closures have received specific intended use acceptance by:

- ABS - American Bureau of Shipping
- DNV - Det Norske Veritas
- LR - Lloyds Register of Shipping
- GL - Germanischer Lloyd
- BV - Bureau Veritas
- MCA - Maritime Coastguard Agency
- RS - Russian Maritime Register of shipping
- RINA - RINA S.P.A., Italy
- CRS - Croatian Registry of Shipping
- USCG - US Coast Guard
- CCG - Canadian Coast Guard (Transport Canada)
- ABYC - American Boat & Yacht Council

Approvals at a glance

- **ABS - type approval, certificate no.13-HS1082451-PDA**
- **Lloyd's Register - type approval certificate no. 03/00088(E3) & 9/60003(E1)**
- **U.S. Coast Guard, CE, ISO-12216 compliant**

Approvals have been awarded and may be obtained for specific intended uses.

AdvanTec Cast Hatches are currently in use on Coast Guard vessels and Naval craft of all types.

AdvanTec Marine can assist with specific intended use applications.

Over 350 self righting vessels 100% completely outfitted with Advantec hatches, doors, windows & portlights. The people you trust, trust Advantec Marine.

Series 2400 Cast Hatches

Service, Value and Experience

Lift Out

Surface Hinges

Freeman Cast Hatches Attributes

- Evenly spaced dog arms exert uniform force on the cover plate.
- Handle position shows when dog arms are engaged or disengaged.
- Handle is always attached. Hatch and handle fit flush with the deck with the handle in a recessed locked position.
- Watertight hatches, designed to seal up to 30' intermittent head, the double-sealing gasket seals tighter under pressure.
- Versatile installation, hatches can be installed in steel, aluminium, wood, or fibreglass decks.
- Complete units include aluminium or steel mounting rings for bolt-in or weld-in installations.
- Dog mechanism assures smooth consistent action; no binding or jamming.
- Quick-acting dog eliminates over or under tightening; hatch operates the same each time.

Freeman Hatches have more quick-acting flush hatch experience, models and features than any manufacturer.

AdvanTec Marine's Freeman hatches are used on a wide variety of fishing boats, tugs, barges, research vessels, offshore tenders, rescue craft and other workboats. The Freeman hatch is designed for new boats, or replacing other hatches in standard openings, or for improving existing craft.

The hatches are fast acting and easy to use. Simply grasp the handle and pull, the shaft slides into place, and with less than a quarter turn, completely disengages the locking mechanism. The dogs and linked handle do the work smoothly in just a second.

Our easy lift system allows simple removal. With the locking mechanism disengaged, the hatch is resting on the deck ring and can be lifted out with one hand.

Hinged Hatches

For hinged models the unique hinging device allows the hatch to be opened more than 180° and "floats" when the hatch is closed to facilitate a tighter seal. Round hatches 18" and larger, and all oval and square hatches with aluminium covers are available hinged from the factory.

Close-up view of standard Freeman "floating" hinge installed on hatch assembly, right.

- Great Value
- Versatile
- Fast Acting
- Reliable
- Easy Lift
- Low Maintenance

- Concealed Yoke Hinge (Optional, selected models)

Quality and Capability

Two Important Features Distinguish the Freeman Cast Hatch from Other Designs

- Built in T-Handle
- Easy Operating Dogging Mechanism

The standard pocketed, stainless steel T-handle is built in, permanently part of the hatch. Grasp the handle and pull, the shaft slides up into place, and with less than a quarter of a turn the locking mechanism completely disengages. The alignment of the handle shows when dog arms are engaged or disengaged.

Evenly spaced dog arms (either 3, 4 or 8 depending on size of hatch) exert uniform sealing pressure on the cover plate. The unique design, fit, and adjustability of Freeman's dog mechanism assure smooth, consistent action; no binding or jamming of parts.

- As hub rotates a cam exponentially increases force at the opposite end of the dog arm
- Each dog is adjustable to insure equal tension on the gasket sealing surface

Typical Hatch Cover Assembly

Knife Edge or Compression Sealing

Compression Seal 2400 Series Hatches

These hatches have easy-to-clean spigots, feature long gasket life, and are economical to purchase.

- Aluminium Deck Rings are intended to be weld installed into aluminium decks and bolt installed into other deck materials.
- Steel Deck Rings are to be weld installed into steel decks only.
- Watertight seal to 30 foot intermittent head, continuous 10 foot head top-loaded pressure (on properly installed and adjusted hatch assemblies).

A-C Aluminium Deck Ring with Compression Seal

S-C Steel Deck Ring with Compression Seal

Knife-edge Seal 2400 Series Hatches

These hatches feature a coaming with drain gutter and an aggressive sealing rim edge. A drain fitting can be installed to minimize water from entering enclosure when hatch is initially opened.

- Aluminium Deck Rings are intended to be weld installed into aluminium decks and bolt installed into other deck materials.
- Steel Deck Rings are to be weld installed into steel decks only.

Hold Open Options

Miscellaneous Options

Quick Ship Doors

250 Series Weathertight doors

250 Hinged door & 250 Dutch door

- Marine Grade .090" Aluminium Captured Panel Skins Mill Finish
- Welded 6063 Flanged Aluminium Frame
- 4" Radius Corners
- Gasket on Frame
- Insulation Korolite Rigid Foam Core
- Bolt-in or Weld-in Frames
- (2) Individual Nylon Dogs
- Stainless Steel Hinges and Fasteners
- Trioving Lockset with 3 keys

250 Hinged

250 Dutch

1212 Series Watertight doors

Hinged Watertight Door

- Marine Grade Interprime 198 Red Oxide Primer Finish
- Welded Mild Steel, Radius Formed Corners
- Gasket on Door Panel for Long Life and Positive Sealing
- 250" Thick, Outside Mild Steel Panel
- (4) Individual Steel Dogs
- (3) Welded Steel Panel Hinges
- Inside and Outside Steel Pull Handles

1212 Watertight

300X Series Sliding Doors

Single Panel Sliding Door

- Commercial Duty Closure Designed for Offshore Use
- Marine Grade 6063 Aluminium
- Mill Finish
- Insulation Korolite Rigid Foam Core
- Tempered Window
- Trioving Lockset with 3 keys

300X Sliding

Premium Yacht & Commercial Vessel

World-class Superyacht Sliding & Hinged Doors

Whether it's aluminium, steel, stainless steel, or light weight carbon fibre composite marine doors, Halyard are your first source for sales, support and supply of AdvanTec marine doors.

- Classed Superyachts

Premium Yacht & Commercial Vessel

Directbond Glass, Hinged/Sliding Doors & Hatches

- Patrol boats, fishing vessels, tugs & pleasure craft

Premium Quality Defence & Commercial/Workboat Doors & Hatches

- Classed vessels
- Rollover rescue, navies, specialized commercial boats

Series 2400 Cast Hatches

Cast Hatch Loading Limits

Maximum allowable loading for cast iron covers listed and their aluminium equivalents. The following values CANNOT be used to extrapolate loading limits on other models or cover/ring combinations.				
Hatch Part Number, Description	Max Load kN (lbf)	Max Load-Fatigue kN (lbf)	Max Watertight Pressure kPa (psi)	Comment
2483-1101 (0136-4001) Oval 15"x24" Cast Iron	13 (2900)	-	28 (4)	All rings excluding aluminium
2433-1001 (2433-3001) Oval 15"x24" Aluminium	2.5 (550)	1.5 (350)	28 (4)	All rings, as cast
2482-1101 (0136-4003) Round 24" Cast Iron	17 (3800)	-	43 (6.2)	All rings excluding aluminium
2411-1001 (2411-3001) Round 24" Aluminium	4.5 (1000)	3 (650)	43 (6.2)	All rings, as cast
2481-1101 (0136-4002) Round 18" Cast Iron	16 (3600)	-	38 (5.5)	All rings excluding aluminium
2404-1001 (0111-4106) Round 18" Aluminium	3 (650)	2 (450)	38 (5.5)	All rings, as cast
2480-1101 (0136-4006) Hinged Square 24"x24" Cast Iron	*3.5 (800)	-	*55 (8)	All rings excluding aluminium
2464-1001 (2464-3001) Hinged Square 24"x24" Aluminium	1.5 (350)	1 (200)	55 (8)	All rings, as cast
				* Failure mode is non-typical and found at hinge pin

Definitions

- **Max load:** maximum point load acceptable on any point on top of the cover.
- **Max load-fatigue:** maximum cyclic point load acceptable on any point on top of the cover. Higher loads will result in non-infinite fatigue life which may be acceptable in certain applications.
- **Max watertightness pressure:** Maximum tank test pressure (inside direction).

Analysis

The load results are based on finite element analysis of hatch/ring combinations. In the case of aluminium castings, the fatigue limit is also included as it is lower than the yield limit. A 2x safety factor was assumed in all instances.

The watertightness pressures listed are based on Type Approvals and previous sealing results. Note that only the aluminium models hold TA certificates.

Higher loading results may be acceptable based on the application and other requirements. Please contact Engineering if additional clarity is required.

High Performance Yacht Cranes

Raising the bar on Yacht Crane Performance

Yacht Cranes:

- High performance
- Efficient lightweight versions
- Heavy duty versions
- Advanced easy operation
- 2 Year warranty

Halyard is the Distributor for UK & Ireland

High Performance Yacht Cranes

High Performance Yacht Lifting Equipment

Steelhead Marine's elegantly designed, high-tech cranes are renowned across the yachting industry, but their ambitions stretch even higher. Through persistence, innovation, and hard work they are aiming to become the leader in advancing hydraulic solutions for the yachting world.

With strong leadership and a dynamic workforce, Steelhead is working to take their innovative products to the next level of sophistication. A diligent sales, engineering, design and build process combined with a close working relationship with their clients ensures Steelhead products will be at the forefront of innovation in the global yacht market.

Benefits of Steelhead Marine

- Engineered for Performance
- Greater lift capacity with reduced crane weight
- Superior engineering and advanced materials
- Durability, strength and reliability
- Compact and attractive design that puts less space and weight demands on your yacht
- Easy to use

2 year industry leading warranty

An optional 3rd year limited warranty with approved commissioning by certified AdvanTec technician

High Performance Yacht Cranes

Whisper Davits

Whisper-quiet, low lift requirements, compact, sleek and dual function davits.

E Series

Lightweight aluminium crane with standard two function (luffing & lifting) operation. Optional upgrades for wireless controller with three or a full four function operation.

ES Series

Lightweight, super efficient, low profile European design with four-function hydraulics.

CT Series

Heavy duty four function hydraulic cranes with live telescoping boom extension and proportional controls.

LDC Series

Lay-down five function hydraulic cranes with live telescoping boom extension and second luffing function. This series is completely custom built to meet individual customer requirements.

Cranes are proof tested to minimum 110% capacity

All cranes above 1500lbs (680kg) come with wired and wireless proportional controls

Compact design uses less deck space

Whisper quiet linear winches use composite rope which is quieter and stronger than steel cable

Aquadrive Antivibration System

CVB 05.10 Aquadrive Moduline B10

Application Examples	Rated Power kW / hp	Crankshaft rpm	Gearbox Ratio
Sailing	35 / 45	3800	2.6:1
Displacement	26 / 35	2600	3.0:1

Note: Above rating examples are based on optimum conditions with 2° for each CV joints. In case a CV joint will run at an angle greater than 2°, the max permitted power must be reduced (normally by 8-9% for each degree over 2°).
The maximum allowable joint angle is 4-8° depending on shaft rpm.

Maximum Static Torque (ØA=20mm)	1034 Nm / 763 lbft
Maximum Propeller Shaft Revolutions	4000 rpm
Maximum Continuous Propeller Thrust	11 kN / 2475 lbft

Drive Shafts
Custom-length CV 05 driveshaft is available in lengths from 150 mm (from 240 mm with tubeshaft design). Maximum length depends on shaft rpm.

Propeller Shaft Options
B10 Standard version accepts propeller shaft ØA from 20mm (3/4") to 40mm (1 1/2"). Oversize version with external clamp mechanism available. All B10 systems are also available with flange coupling to suit standard BW 5" propeller flange. Contact your local Halyard representative to assist you in selecting a suitable Aquadrive system for your application.

CVB 10.10 Aquadrive Moduline B10

Application Examples	Rated Power kW / hp	Crankshaft rpm	Gearbox Ratio
Planing	62 / 85	3800	2.0:1
Sailing	55 / 75	3800	2.6:1
Displacement	40 / 55	2600	3.0:1

Note: Above rating examples are based on optimum conditions with 2° for each CV joints. In case a CV joint will run at an angle greater than 2°, the max permitted power must be reduced (normally by 8-9% for each degree over 2°).
The maximum allowable joint angle is 4-8° depending on shaft rpm.

Maximum Static Torque (ØA=1")	1300 Nm / 969 lbft
Maximum Propeller Shaft Revolutions	4000 rpm
Maximum Continuous Propeller Thrust	11 kN / 2475 lbft

Drive Shafts
Custom-length CV 10 driveshaft is available in lengths from 150 mm (from 240 mm with tubeshaft design). Maximum length depends on shaft rpm.

Propeller Shaft Options
B10 Standard version accepts propeller shaft ØA from 20mm (3/4") to 40mm (1 1/2"). Oversize version with external clamp mechanism available. All B10 systems are also available with flange coupling to suit standard BW 5" propeller flange. Contact your local Halyard representative to assist you in selecting a suitable Aquadrive system for your application.

Gearbox Adaptor Plate

Aquadrive Antivibration System

CVB 15.10 Aquadrive Moduline B10

Application Examples	Rated Power kW / hp	Crankshaft rpm	Gearbox Ratio
Planing	114 / 155	3800	2.0:1
Semi-displacement	96 / 130	3300	2.2:1
Sailing	85 / 115	3300	2.6:1
Displacement	66 / 90	2600	3.0:1

Note: Above rating examples are based on optimum conditions with 2° for each CV joints. In case a CV joint will run at an angle greater than 2°, the max permitted power must be reduced (normally by 8-9% for each degree over 2°).
The maximum allowable joint angle is 4-8° depending on shaft rpm.

Propeller Shaft Options
B10 Standard version accepts propeller shaft ØA from 20mm (3/4") to 40mm (1 1/2"). Oversize version with external clamp mechanism available.
All B10 systems are also available with flange coupling to suit standard BW 5" propeller flange. Contact your local Halyard representative to assist you in selecting a suitable Aquadrive system for your application.

CVB 21.10 Aquadrive Moduline B10

Application Examples	Rated Power kW / hp	Crankshaft rpm	Gearbox Ratio
Planing Boat	173 / 235	3800	2.0:1
Semi-displacement Motorboat	147 / 200	3300	2.2:1
Displacement Motorboat	96 / 130	2500	3.1:1

Note: Above rating examples are based on optimum conditions with 2° for each CV joints. In case a CV joint will run at an angle greater than 2°, the max permitted power must be reduced (normally by 8-9% for each degree over 2°).
The maximum allowable joint angle is 4-8° depending on shaft rpm.

Propeller Shaft Options
B10 Standard version accepts propeller shaft ØA from 20mm (3/4") to 40mm (1 1/2"). Oversize version with external clamp mechanism available.
All B10 systems are also available with flange coupling to suit standard BW 5" propeller flange. Contact your local Halyard representative to assist you in selecting a suitable Aquadrive system for your application.

CVB 21.20 Aquadrive Moduline B20

Application Examples	Rated Power kW / hp	Crankshaft rpm	Gearbox Ratio
Displacement	100 / 135	2600	3.0:1
Planing	165 / 225	3900	2.0:1

Note: Above rating examples are based on optimum conditions with 2° for each CV joints. In case a CV joint will run at an angle greater than 2°, the max permitted power must be reduced (normally by 8-9% for each degree over 2°).
The maximum allowable joint angle is 4-8° depending on shaft rpm.

Propeller Shaft Options
B20 Standard version accepts propeller shaft ØA from 35mm (1 1/2") to 50mm (2"). Oversize version with external clamp mechanism available.
All B20 systems are also available with flange coupling. Contact your local Halyard representative to assist you in selecting a suitable Aquadrive system for your application.

CVB 30.20 Aquadrive Moduline B20

Application Examples	Rated Power kW / hp	Crankshaft rpm	Gearbox Ratio
Displacement	130 / 175	2600	3.0:1
Planing	200 / 270	3300	2.0:1

Note: Above rating examples are based on optimum conditions with 2° for each CV joints. In case a CV joint will run at an angle greater than 2°, the max permitted power must be reduced (normally by 8-9% for each degree over 2°).
The maximum allowable joint angle is 4-8° depending on shaft rpm.

Propeller Shaft Options
B20 Standard version accepts propeller shaft ØA from 35mm (1 1/2") to 50mm (2"). Contact your local Halyard representative to assist you in selecting a suitable Aquadrive system for your application.

Aquadrive Antivibration System

CVB 32.30 Aquadrive Moduline B30

Application Examples	Rated Power kW / hp	Crankshaft rpm	Gearbox Ratio
Displacement	195 / 265	2600	3.0:1
Planing	270 / 365	3000	2.0:1

Note: Above rating examples are based on optimum conditions with 2° for each CV joints. In case a CV joint will run at an angle greater than 2°, the max permitted power must be reduced (normally by 8-9% for each degree over 2°).
The maximum allowable joint angle is 4-8° depending on shaft rpm.

NOTE: Above does not include Gearbox specific adaptor flange. Adds approximately 45mm.

Propeller Shaft Options

B30 Standard version accepts propeller shaft ØA from 40mm (1½") to 70mm (2½"). All B30 systems are also available with flange coupling. Contact your local Halyard representative to assist you in selecting a suitable Aquadrive system for your application.

Maximum Static Torque (ØA=65mm)	3000 Nm / 2215 lbft
Maximum Propeller Shaft Revolutions	1700 rpm
Maximum Continuous Propeller Thrust	21 kN / 4725 lbft

Drive Shafts
Custom-length CV 32 driveshaft is available in lengths from 300mm (from 420mm with tubeshaft design). Maximum length depends on shaft rpm.

CVB 42.680 Aquadrive Heavy Duty HDL

Application Examples	Rated Power kW / hp	Crankshaft rpm	Gearbox Ratio
Displacement	220 / 300	2100	3.0:1
Planing	420 / 570	2600	2.0:1

Note: Above rating examples are based on optimum conditions with 2° for each CV joints. In case a CV joint will run at an angle greater than 2°, the max permitted power must be reduced (normally by 8-9% for each degree over 2°).
The maximum allowable joint angle is 5-8° depending on shaft rpm.

NOTE: Above does not include Gearbox specific adaptor flange. Adds approximately 50mm.

Propeller Shaft Options

HDL 680 Standard version accepts propeller shaft ØA from 50mm (2") to 70mm (2½"). Contact your local Halyard representative to assist you in selecting a suitable Aquadrive system for your application.

Maximum Static Torque	10500 Nm / 7750 lbft
Maximum Propeller Shaft Revolutions	1700 rpm
Maximum Continuous Propeller Thrust	40 kN / 9000 lbft

Drive Shafts
Custom-length CV 42 driveshaft is available in lengths from 270mm (from 430mm with tubeshaft design). Maximum length depends on shaft rpm.

CVB 42.30 Aquadrive Moduline B30

Application Examples	Rated Power kW / hp	Crankshaft rpm	Gearbox Ratio
Displacement	240 / 325	2800	3.0:1
Planing	310 / 420	2600	2.5:1

Note: Above rating examples are based on optimum conditions with 2° for each CV joints. In case a CV joint will run at an angle greater than 2°, the max permitted power must be reduced (normally by 8-9% for each degree over 2°).
The maximum allowable joint angle is 4-8° depending on shaft rpm.

NOTE: Above does not include Gearbox specific adaptor flange. Adds approximately 50mm.

Propeller Shaft Options

B30 Standard version accepts propeller shaft ØA from 40mm (1½") to 70mm (2½"). All B10 systems are also available with flange coupling. Contact your local Halyard representative to assist you in selecting a suitable Aquadrive system for your application.

Maximum Static Torque (ØA=40mm)	3000 Nm / 2215 lbft
Maximum Propeller Shaft Revolutions	1700 rpm
Maximum Continuous Propeller Thrust	21 kN / 4725 lbft

Drive Shafts
Custom-length CV 42 driveshaft is available in lengths from 270mm (from 430mm with tubeshaft design). Maximum length depends on shaft rpm.

CVB 42.680 Aquadrive Heavy Duty HDL Flanged

Application Examples	Rated Power kW / hp	Crankshaft rpm	Gearbox Ratio
Displacement	220 / 300	2600	3.0:1
Planing	420 / 570	2600	2.0:1

Note: Above rating examples are based on optimum conditions with 2° for each CV joints. In case a CV joint will run at an angle greater than 2°, the max permitted power must be reduced (normally by 8-9% for each degree over 2°).
The maximum allowable joint angle is 5-8° depending on shaft rpm.

NOTE: Above does not include Gearbox specific adaptor flange. Adds approximately 50mm.

Propeller Shaft Options

HDL 680 Standard version accepts propeller shaft ØA from 50mm (2") to 70mm (2½"). Contact your local Halyard representative to assist you in selecting a suitable Aquadrive system for your application.

Maximum Static Torque	10500 Nm / 7750 lbft
Maximum Propeller Shaft Revolutions	1700 rpm
Maximum Continuous Propeller Thrust	40 kN / 9000 lbft

Drive Shafts
Custom-length CV 42 driveshaft is available in lengths from 270mm (from 430mm with tubeshaft design). Maximum length depends on shaft rpm.

Aquadrive Antivibration System

HDL 48.690 Aquadrive Heavy Duty - Flanged Option Available

Application Examples	Rated Power kW / hp	Crankshaft rpm	Gearbox Ratio
Displacement	410 / 550	2100	3.0:1
Planing	670 / 900	2800	2.0:1

Note: Above rating examples are based on optimum conditions with 2° for each CV joints. In case a CV joint will run at an angle greater than 2°, the max permitted power must be reduced (normally by 8-9% for each degree over 2°).
The maximum allowable joint angle is 5-8° depending on shaft rpm.

NOTE: Above does not include Gearbox specific adaptor flange.
Adds approximately 50mm.

Propeller Shaft Options

HDL 680 Standard version accepts propeller shaft ØA from 50mm (2") to 70mm (2 1/2").
Contact your local Halyard representative to assist you in selecting a suitable Aquadrive system for your application.

HDL 60.700 Aquadrive Heavy Duty - Flanged Option Available

Application Examples	Rated Power kW / hp	Crankshaft rpm	Gearbox Ratio
Displacement	370 / 500	1900	2.7:1
Planing	660 / 900	2300	1.75:1

Note: Above rating examples are based on optimum conditions with 2° for each CV joints. In case a CV joint will run at an angle greater than 2°, the max permitted power must be reduced (normally by 8-9% for each degree over 2°).
The maximum allowable joint angle is 3° depending on shaft rpm. For higher benching angles please consult Halyard.

NOTE: Above does not include Gearbox specific adaptor flange.
Adds approximately 60mm.

Propeller Shaft Options

HDL 700 Standard version accepts propeller shaft ØA from 50mm (2") to 70mm (2 1/2").
Contact your local Halyard representative to assist you in selecting a suitable Aquadrive system for your application.

HDL 60.700 Aquadrive Heavy Duty HT - High Tensile Steel

Application Examples	Rated Power kW / hp	Crankshaft rpm	Gearbox Ratio
Displacement	515 / 700	1900	3.0:1
Planing	735 / 1000	2300	2.5:1

Note: Above rating examples are based on optimum conditions with 2° for each CV joints. In case a CV joint will run at an angle greater than 2°, the max permitted power must be reduced (normally by 8-9% for each degree over 2°).
The maximum allowable joint angle is 3° depending on shaft rpm. For higher benching angles please consult Halyard.

NOTE: Above does not include Gearbox specific adaptor flange.
Adds approximately 60mm.

Propeller Shaft Options

HDL 700 Standard version accepts propeller shaft ØA from 50mm (2") to 70mm (2 1/2").
Contact your local Halyard representative to assist you in selecting a suitable Aquadrive system for your application.

HDL 60.780 Aquadrive Heavy Duty Flanged

Application Examples	Rated Power kW / hp	Crankshaft rpm	Gearbox Ratio
Displacement	590 / 800	2100	3.0:1
Planing	1100 / 1500	2300	1.75:1

Note: Above rating examples are based on optimum conditions with 2° for each CV joints. In case a CV joint will run at an angle greater than 2°, the max permitted power must be reduced (normally by 8-9% for each degree over 2°).
The maximum allowable joint angle is 3° depending on shaft rpm. For higher benching angles please consult Halyard.

NOTE: Above does not include Gearbox specific adaptor flange.
Adds approximately 60mm.

Propeller Shaft Options

HDL 780 Standard version accepts propeller shaft ØA from 50mm (2") to 70mm (2 1/2").
Contact your local Halyard representative to assist you in selecting a suitable Aquadrive system for your application.

Aquadrive Mounts

Aquadrive System Engine Mounts

Engine Mounts	Weight
50210 Series engine mounts complete with stud and any stiffness grade	0.5kg
50220 Series engine mounts complete with stud and any stiffness grade	1.1kg
50230 Series engine mounts complete with stud and any stiffness grade	2.6kg
50240 Series engine mounts complete with stud and any stiffness grade	9.5kg

It is essential to select the correct rubber grade and mount for the engine or generator in question. For reference, the chart above shows the level of deflection (or squash) that will occur on each model of mount for a given loading.

In general you should aim for 3mm on the 50210, 4mm on the 50220, 5mm on the 50230 and 6mm on the 50240. The numbering system is simple: A 50223 mount is the 50220 model with number three rubber hardness and so on. Some engines, particularly those with less than four cylinders, require particular care and your distributor will help with these.

Seatorque Shaft Systems

The BOSS™ system is the internationally acclaimed Bolt On Shaft System by Seatorque Control Systems

- Significant reduction of noise and vibration from engines, shafts and propellers
- Alignment issues eradicated
- Reduced installation times
- Mechanical losses reduced to 2% total
- Up to 8% reduction in fuel consumption and increased delivered horse power
- Reduced underwater drag

Halyard is the Distributor for UK, Europe & Scandinavia

Seatorque Shaft Systems

Developed over twenty-five years and fitted as standard equipment to a growing number of globally recognised boat manufacturers, Seatorque Shaft Systems offer a multitude of noise and vibration, fuel consumption and delivered power benefits.

- The 'BOSS' is a self-contained shaft and thrust bearing assembly supplied as a complete unit from the transmission output coupling to the propeller shaft end
- An oil-filled stainless-steel tube, in which the propeller shaft rotates supported by roller bearings, hydrodynamic journal bearings, and thrust bearings reduces drag to an absolute minimum
- The thrust bearing housing, at the inboard end of the tube, bolts to the hull transferring thrust from the propellers to the vessel structure and not through the transmission and engine
- Flexible isolators located between the 'BOSS' system, the vessel's hull, and the strut absorb thrust loads as well as significantly reducing noise and vibration

Features & Benefits

The enclosed shaft arrangement eliminates turbulence and drag, referred to as the 'Magnus Effect', so the water flow to the propeller is far less disturbed compared to a shaft spinning in open water. Inefficiency and drag created by cutlass bearings and shaft misalignment are also eliminated.

The system is completed with a Cardan shaft connecting the 'BOSS' system to the transmission reducing the need for very accurate and time-consuming engine alignment. An oil reservoir located in the engine room allows easy monitoring of the oil level.

Conventional shaft installations rely on anti-vibration mounts to absorb engine and transmission vibration as well as propeller thrust. The 'BOSS' system removes the thrust from the mounts so they can then be optimised for absorption of engine vibration and torque, reducing the transmission of vibration into engine beds and the vessels structure.

The combination of taper and needle roller bearings, the non-rotating full-length shaft casing, the resiliently mounted thrust bearing and strut, and the optimised engine mounts all contribute to the very significant reduction of noise and vibration, typically over 50%

In addition, the reduction of mechanical losses to only 2%, thus providing valuable extra power for propulsion, and fuel consumption reductions of circa 8%, as verified across a number of in-service case studies, are very valuable considerations when specifying your shaft system.

System Maintenance

Recommended service intervals on the 'BOSS' are very realistic for the commercial operator as well as for recreational use. Cost effective oil and seal changes are not required until 3,000 hours while a major inspection is only necessary every 10,000 hours or ten years.

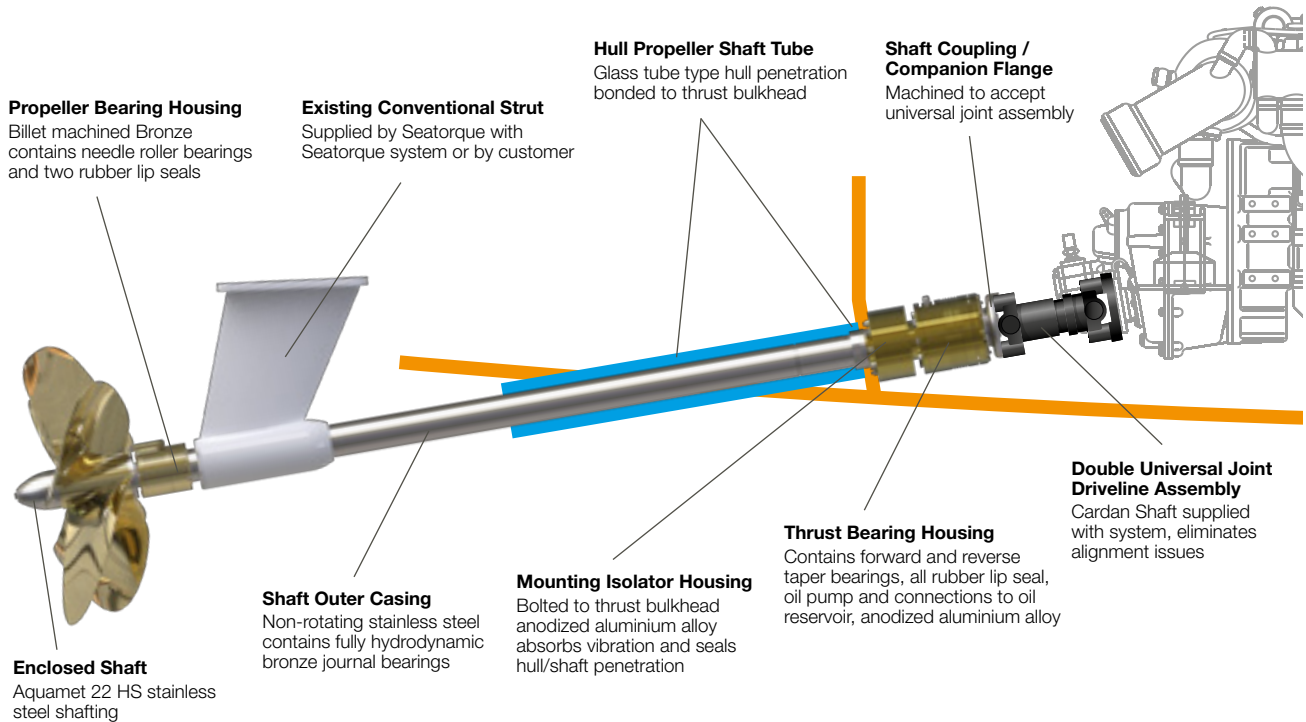

Seal and oil changes are carried out when the vessel is out of the water, a job that takes approximately 1-2 hours per system (excluding removal and refitting of the propeller) comparing very favourably with conventional shaft systems, including those with a thrust bearing, which require: gland/stuffing box maintenance or replacement, cutlass bearing replacement, shaft/ strut alignment, and even shaft replacement in very silty/sandy waters. It is therefore very clear to see the maintenance advantages with the 'BOSS' system.

STM3 Enclosed Bolt-on-Shaft System 'BOSS' - Typical Installation

In summary, the Seatorque 'BOSS' is a premium engineered, proven system that offers significantly reduced levels of noise and vibration, improved onboard comfort, increased delivered propeller power and reduced fuel consumption with very low maintenance requirements. The 'BOSS' further delivers unrivalled ruggedness in operation coupled

with the lowest underbody drag of any system currently available.

With systems available for commercial and recreational power and sailing vessels from circa 30 to 200 feet, there is a system to suit your needs.

Additional Benefits of all Seatorque Propulsion Systems

- Designed to handle power suitable for vessels from 30 Feet to 200 Feet, with no need for high cost of ownership, and often complex, multi-engine and drive packages.
- All BOSS propulsion systems are always Joy Stick compatible.
- Builders enjoy simplified and dramatically reduced installation times.
- End users enjoy a silky smooth, whisper quiet ride, improved operating efficiency and range, plus easy maintenance cycles; with rugged reliable operation.
- Popular options include Seatorque's Bio-Mar fully biodegradable Oil; QuickKutter line cutters, extended warranty packages and more.
- All equipment is fully supported by our worldwide network of sales and service professionals, and backed by Seatorque's
- International 2-year Limited Warranty.

MX1 BOSS-Lite

Seatorque's thrust bearing and Isolator technology mated to traditional shafting. This system offers many of the benefits of Seatorque's patented technologies. Perfect for retro-fits as well as new construction.

MX2 Duo-BOSS

A new concept in the field of dual, counter rotating propellers with no horsepower restrictions. MX2 is a fixed shaft application, and an extension of the patented BOSS oil lubricated technology. This system offers all the benefits of BOSS performance with even more added efficiency.

Self-adhesive mechanical mounting pin to assist with the installation of the materials.

Halyard self-adhesive joining tape.

Class 0
FIRE RATED

Fuel & Oil
RESISTANT FACINGS

Noise Insulation Materials & Accessories

*A proven range of high quality
UK manufactured noise insulation materials*

A range of technically advanced noise insulation materials:

- Compliant with the European Recreational Craft Directive
- Available in standard thicknesses of 12, 25, 32, and 45mm
- Three tough fuel and oil resistant facings: Maritex, Sealglass and Reinforced Foil
- Range of tapes & accessories

H000553	S4041	1.2m x 1m x 2.4mm Barrier Layer
H000533		Stick Pin & Backing Washer

Halyard noise insulation uses high performance barrier materials to achieve excellent acoustic results with low frequency noise associated with diesel engines and other onboard noise generating equipment.

Technical Specification

- Fire Safety - Compliant with European Recreational Craft Directive (RCD)
- Class 0 fire rated (BS476-7) on selected products
- Lowest possible weight
- All materials tested to ISO 4589-3 (oxygen index – elevated temperature)
- Compliant to ISO 9094-2 Fire Protection for craft with a hull over 15m
- Bulkhead performance up to R_w 54dB (EN ISO 717-1)
- Fuel & oil resistant facing

Packing (12, 25 and 32mm materials):

Halcoustic only: 25mm supplied in packs of 4 sheets 990mm x 590mm (2.3m²)

12 & 32mm supplied in packs of 4 sheets 1000mm x 600mm (2.4m²)

Box weight is approximately 14kg for 12mm, 16kg for 25mm and 19kg for 32mm.

Packing (45mm materials):

45mm supplied in packs of 2 sheets 1000mm x 600mm (1.2m²).

Box weight is approximately 16kg.

Actual noise attenuation achievable with the products is dependant on many factors relating to the specific installation. Please note the above graphs are indicative only.

Please contact Halyard for further information and detailed product specifications to suit your particular installation requirements.

Halyard Acoustic Enclosures

Halyard

Custom Generator Enclosure

Halyard are now able to offer a range of generator enclosures designed in-house and manufactured to suit the particular engine / generator model and installation requirements.

The standard specification for these acoustic enclosures includes the following but other options are available on request:

- Modular Aluminium frame
- Removable and fixed panels to suit and allow for service access
- All panels internally lined with Halyard noise insulation materials
- Base frame skid with optional integrated fuel tank
- Cut outs to facilitate service connections
- Cooling fans
- Mounting to accommodate generator manufacturers control panel

Please contact Halyard for further information.

Wave
International

Lloyd's
Register

Wave International Ltd Filtration Systems

Main distributors for Wave International technically advanced marine filtration systems

- **Wavestream** bilge filter systems
- **Wavebrite** waste water filter system
- **Flostream** drinking water filter system
- **Prostream** watermaker filter protection system
- **Waveair** holding tank vent filter system
- **Waveshine** wash & rinse system

Wave Filtration Systems

Effective control and prevention of oily contaminated bilge water. The Wavestream bilge filters are Lloyd's Register of shipping Type Approved and Boat Safety Scheme compliant. Wavestream provides an efficient way of managing bilge water removal without the need for holding tanks whilst still protecting the environment.

Wavestream Micro Bilge Filter

Lloyd's Register

Ref: WMS - Part No. H000610	
Flow Rate	1 - 40 litres per minute
Maximum Pressure	8 bar
Maximum Temperature	40°C
Minimum Temperature	1 °C
Connection	3/4" BSP (3/4 NPT available)
Cartridge	WC-CM H000611
With Whale Orca 12V Pump	WMSFP H020978

Wavestream System 1 Bilge Filter

Lloyd's Register

Ref: WSS1 - Part No. H000596	
Flow Rate	1 - 40 litres per minute
Maximum Pressure	6.2 bar
Maximum Temperature	40°C
Minimum Temperature	1 °C
Connection	3/4" BSP
Cartridge	WS-C1 H000597
With Whale Orca 12V Pump	WSS1FP H020982

Wavestream System 2 Bilge Filter

Lloyd's Register

Ref: WSS2 - Part No. H000601	
Flow Rate	1 - 265 litres per minute
Maximum Pressure	6.8 bar
Maximum Temperature	37°C
Minimum Temperature	1 °C
Connection	1 1/2" BSP
Cartridge	WS-C2 H000602
With Whale Orca 12V Pump	WSS2FP H020983

Wavestream System 3 Bilge Filter

Lloyd's Register

Ref: WSS3 - Part No. H007262	
Flow Rate	1 - 265 litres per minute
Maximum Pressure	6.2 bar
Maximum Temperature	37°C
Minimum Temperature	1 °C
Connection	1 1/2" BSP
Cartridge	WS-C3 H000608
With Whale Orca 12V Pump	WSS3FP H020985

Wavestream MiniBOSS IMO Bilge Filter System

MPEC 107(49) Certified bilge filter system giving effective control and prevention of oily bilge water discharge using Wavestream System 3 filters.

- MiniBOSS from Recovered Energy Inc., with Wavestream removes trace oils to less than 5 ppm, keeping within the IMO required 15 or 5 ppm levels
- IMO Certified Oil in Water Monitor with 18 month data logging, 2 models available
- Wave MiniBOSS 24V dc maximum flow rate 0.50m³/hr
- Wave MiniBOSS 110V ac, 240V ac maximum flow rate 0.50m³/hr
- Compact, light and easy to maintain with Wavestream high capacity cartridges

Wave Filtration Systems

Wavebrite Waste Water Filter System

Wavebrite discharge meets EU Council Directive concerning waste water treatment (91/271/EEC).

- Wavebrite has five main components with four stage waste water filtration; main Wavebrite module, pre-filters, pump, pump strainer and control
- Pump with automatic control, no holding tanks or pump out required
- The components are modular and can be located separately, connected by flexible hose for ease of installation
- Basic models have 15l/min maximum flow rate with an option to increase available on request

Wavebrite SMART

Marine grey water filtration unit that is self-monitoring and gives a clear indication of how grey water onboard is being responsibly processed with due care for the environment.

Information such as daily volume processed, accumulative volume, status of the various filters within the unit is all displayed on a screen with audio and visual alarms, the screen can also be remote from the unit.

Grey water is discharged real time which negates the need for grey water holding tanks which significantly reduces the boat weight.

The unit is compact, has its own pump within a sound and vibration suppressed enclosure.

Simple to install and maintain with a high capacity of 20,000 litres between filter cartridge changes, this innovative product is based on the proven Wavebrite filter unit already installed to many commercial and leisure boats across the world.

Dimensions:
Length 670mm, Height 355mm + AV Mounts,
Width 360mm

Overboard discharge meets the EU Waste Water Directive.

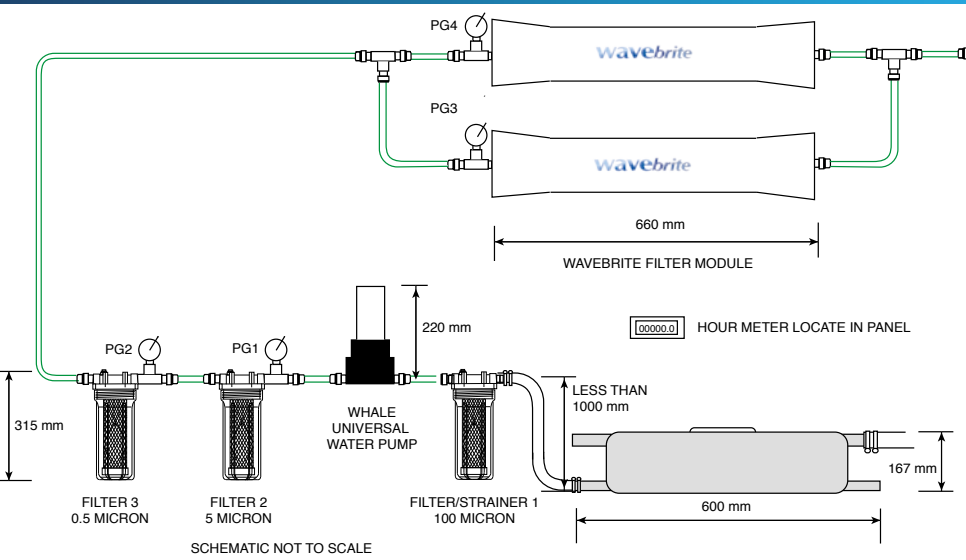

Wavebrite System		
Reference	Part No.	Description
WBS	H020996	Wavebrite System 12 / 24V dc - complete with pump, filters, gauges, control pump, fittings and pipe
WBLite	H020997	Wavebrite Lite System 12 / 24V dc - complete as WBS for smaller boats
WB2010	H019882	Wavebrite 2010 System 12 / 24V dc - complete for boats with multiple showers and basins
WB2020	H020998	Wavebrite 2020 System 12 / 24V dc - complete as 2010 but larger capacity
WB100	H020999	Wavebrite 100 System 12 / 24V dc or ac - complete for S/Y and boats requiring larger capacity, processes up to 100 cubic metres
WB300	H02100	Wavebrite 100 System 12 / 24V dc or ac - complete for S/Y and boats requiring larger capacity, processes up to 300 cubic metres

Wave Filtration Systems

Wavebrite Grease Trap

The Wavebrite Grease Trap is a useful addition to any Wavebrite system when processing galley waste water. It removes food waste, fat and grease which helps prevent solids forming in the system and extends the life of the Wavebrite module and filter cartridges.

- Simply installed in the drain from the galley sink or dishwasher
- Removes food debris, fat and grease retaining them in a food basket and grease trap reservoir
- Extends the life of the Wavebrite module and filter cartridges and improves pump efficiency
- The fat / grease level is visible through the inspection glass which indicates when the trap needs servicing
- Two sizes are available - 1.75 and 4.50 litre

Wavebrite Grease Trap		
Reference	Part No.	Description
WBGT/1.75	H021005	Wavebrite Grease Trap 1.75l capacity
WBGT/4.5	H021006	Wavebrite Grease Trap 4.50l capacity

Wavebrite 1.75l Dimensions

Flostream HiFlo Drinking Water Filters

The Flostream HiFlo 10 and HiFlo 10 Micro are designed for higher flow rate drinking/wash applications providing premier quality, safe healthy water and eliminating the need for plastic water bottles.

- WRAS and NSF Certified components and filter cartridge
- Chlorine, taste and odour reduction
- Limescale inhibition and reduces heavy metals
- Bacteriostatic control to inhibit microbial growth in the water system
- Filter body easily removed with spanner provided. Replace cartridge after 6 months or if it has passed stated capacity of 6000 litres or 3000 litres for HiFlo 10 Micro.
- Pressure range 0.7 - 8 bar. Temperature range 4 - 45°C. Recommended maximum flow rate 10 litres per minute
- Simple installation with 15mm push-fits for flexi-pipe connectors or standard 3/4" BSP

Flostream HiFlo 10		
Reference	Part No.	Description
FLOHF10	H021011	Flostream HiFlo housing, cartridge and spanner. 3/4" BSP or 15mm push-fit connectors (Part No. FLOMHF10-15). Maximum recommended flow rate 10l/min
FLOHF10-15	H020049	Flostream HiFlo housing, cartridge and spanner with 15mm quick connectors
FLOHF10C	H021012	Flostream HiFlo replacement cartridge, capacity 6,000 litres
FLOMHF10	H021011	Flostream HiFlo 10 Micro housing with bracket, cartridge and spanner. 3/4" BSP or 15mm push-fit connectors (Part No. FLOMHF10-15). Maximum recommended flow rate 10l/min
FLOHF10C	H021012	Flostream HiFlo 10 Micro replacement cartridge, capacity 3,000 litres

HiFlo 10 Micro Dimensions

Wave Filtration Systems

Flostream Drinking Water Cartridge & Head

Designed to provide premium quality drinking water and for all food service applications. Available in two sizes giving a practical, cost effective point of use solution for safe, healthy water.

- NSF 42 & 53 Certified to meet health and aesthetic standards
- Chlorine, taste and odour reduction
- Limescale and KDF inhibition, anti-bacterial and reduces heavy metals
- Cyst reduction, removes contaminants that cause health issues
- Bacteriostatic control to inhibit microbial growth in the water system
- Cartridge easy connect / release with a quarter turn
- Pressure range 0.7 - 8.5 bar. Temperature range 2 - 38°C. Recommended flow rate 1.9l/min
- Simple installation with push-fit connectors for standard 10mm flexi-pipe. Install in vertical position with cartridge hanging down for easy replacement

Flostream		
Reference	Part No.	Description
FLOW2	H019878	Flostream Cartridge 2 replacement cartridge,length plus head 264mm. Capacity 3,800l
FLOW4	H021009	Flostream Cartridge 4 replacement cartridge, length plus head 372mm. Capacity 7,600 litres
FLOWPHD	H021008	Flostream Universal Head with 10mm quick connect ports
FLOWPHD15	H019877	Flowstream Universal Head with 15mm quick connect ports

Flostream Dock Water Filter, Cartridge & Hose

The Flostream Dock Water Filter is installed in the water supply to pre-filter water when filling onboard tanks. Removing most impurities in three stages, further purification at the point of use can then be applied if required.

- Removes particulates and chlorine improving the taste and smell as a pre-filter
- STAGE 1 - Removes large particulates
- STAGE 2 - Removes sediments down to one micron
- STAGE 3 - Effectively reduces Chlorine, smell and odours, improving taste and colour with bacteriostatic control
- Maximum pressure 6.20 bar. Temperature range 1 - 45°C. Recommended maximum flow rate 20l/min
- Simple installation, hose supplied with 3/4" BSP connectors. The filter is installed between the supply tap and the onboard tanks

Note: Bracket is not included.

Reference	Part No.	Description
FDF	H021023	Flostream dock water filter and housing, cartridge, connections and supply hose
FDF-C1	H021024	Flostream dock water filter replacement cartridge, length plus head 315mm. Capacity 20,000 litres
WSS1SSMB	H024439	Flostream Wavestream1/Dock Filter Mounting Bracket

Waveair Holding Tank Vent Filter

Eliminates foul smells in and around your boat from holding tank vents. Waveair is simply installed in the vent line after the tank and before the outlet. Removes the organic compounds that cause bad odours

- Waveair uses a highly effective filter media, available in two sizes, 430mm and 200mm long, both for 16,19 and 25mm hose connections
- Single module supplied with brackets and connections
- Easy filter replacement. Simply remove the complete filter after one year, retaining bracket and connections and insert replacement filter
- Not suitable for treated sewage with significant amounts of chemicals, chlorine or other oxidising agents within the tank

Waveair		
Reference	Part No.	Description
WAM16	H021025	Waveair Micro tank vent filter - 16mm
WAM19	H021026	Waveair Micro tank vent filter - 19mm

WAMC	H021028	Waveair Micro replacement filter - 16 & 19mm
WAMC25	H021030	Waveair Micro replacement filter - 25mm
WA16	H021013	Waveair tank vent filter - 16mm
WA19	H021014	Waveair tank vent filter - 19mm
WA25	H021015	Waveair tank vent filter - 25mm
WAC	H021016	Waveair replacement filter - 16 & 19mm
WAC25	H021031	Waveair replacement filter - 25mm

PROstream Watermaker Duo Cartridge

Unique pre-RO watermaker protection removes both sediment and trace oils. Combined string wound or melt blown cartridge with Wavestream oil removal technology. The PROstream cartridge replaces an existing pre-filter and offers additional oil protection phase

- Protects main RO by efficient oil removal with high dirt holding properties
- Wide range of sizes, micron ratings and end cap configurations available
- Consistent filtration over the life of the cartridge
- Marine, domestic and industrial applications

PROstream		
Reference	Part No.	Description
PRO-C1	H021017	PROstream wound outer 5 micron oil removal cartridge fits standard 10" housings
PRO-C1 / 20	H021018	PROstream wound outer 5 micron oil removal cartridge fits standard 20" housings
PRO-C2	H021019	PROstream wound outer 5 micron oil removal cartridge fits large diameter Big Blue 10" housings
PRO-C2 / 20	H021020	PROstream wound outer 5 micron oil removal cartridge fits large diameter Big Blue 20" housings

Wave Filtration Systems

Waveshine Inline Wash & Rinse System

Waveshine is a wash down filter system that removes the minerals from water that causes spotting and smears when washing and rinsing your boat. When also used to filter water going onboard it removes hardness softening the water for regular use, protecting appliances, taps, sinks, showers, pumps and systems.

- Waveshine 4250 and 8500 use a highly effective resin media with 4250 and 8500 litre capacities, depending on water hardness
- Replacement salt cartridges and hardness test kits available
- Waveshine can be used free standing on the dock or installed onboard. Saddle clamps work as a stand on the dock or as installation brackets
- Softened water dramatically reduces scaling in appliances, pumps and systems and improves the effectiveness of soaps and detergents reducing the impact on the environment

Waveshine		
Reference	Part No.	Description
WSN4250	H022157	Waveshine system with 4250 litre capacity, regeneration filter, salt cartridge, hose and hardness kit
WSN8500	H021021	Waveshine system with 8500 litre capacity, regeneration filter, salt cartridge, hose and hardness kit
WSN-CS1	H021022	Waveshine 4250 & 8500 regeneration cartridge
WSN-HK	H021029	Waveshine hardness test kit

Waveshine Clear Cartridge Wash & Rinse System

The Waveshine Clear range of wash down filter systems remove the minerals from water that cause spotting and smears when washing and rinsing your boat, leaving a clear, shiny finish.

Three models available, Clear 300, 1000 and 2000, reflecting the approximate capacity of the cartridge in the filter in litres. A replaceable cartridge in each filter system removes and retains the minerals from the rinse water. **Note:** Must not be used as drinking water filter.

- Waveshine Clear Systems use a highly effective resin media with an approximate 300, 1000 and 2000 litre capacity, depending on model and water hardness

- The cartridges are non-regenerable and replacements are available
- Waveshine Clear can be used free standing on the deck or installed onboard. Stainless brackets are supplied for internal fitting
- Maximum performance is ensured with no need for wipe or leather off after rinsing reducing the overall time for wash down leaving a clear, shiny finish all over the vessel

Waveshine Clear 300

Ref: WSN300 - H23020	
Flow Rate	1 - 40 litres per minute
Maximum Pressure	6.2 bar
Maximum Temperature	40°C
Minimum Temperature	1 °C
Connection	3/4" BSP

Halyard Service Support

To ensure reliable operation and long service life of onboard equipment, it is critical that regular inspection and maintenance is carried out. To support this Halyard is able to provide its customers with the high level of support required with our service operation providing both field based and workshop support.

This service is available both in the UK and overseas from our own support engineers and also through our network of distributors and dealers.

We offer: Health Checks, Maintenance, Repair, Overhaul, Equipment Replacement, and Sea trial services for all Halyard supplied products but also for other selected onboard equipment. Service support includes but is not limited to the following:

- Exhaust systems & components
- Steelhead cranes
- Freeman hatches & doors
- Aquadrive antivibration systems
- Seatorque shaft systems
- Conventional shaft systems
- Steering gear
- Diesel engines & generators

If you have the requirement for any of the above services, please contact us to discuss your detailed requirements.
