

Quality in pontoons and Split Hopper Barges

Baars BV has already more than 185 years of experience in dredging equipment and modular container pontoons. The company was founded in 1832 by Kornelis Baars, who started building wooden barges and rowing boats.

Pontoons in all shapes and sizes

Baars Confloat B.V. is the market leader for many years of modular "containerized" pontoons. The unique modular Confloat system (nut-bolt connection) guarantees absorption of high dynamic and static forces. We have a large number of units available for rental and sale, new and young used. Next to this you can choose a wide range of mono "hull" pontoons.

Top quality dredging materials

We are also able to offer you dredgers and transport barges. Baars Charter has specialized in the sale and hire of dredging materials, for instance drywell hopper barges, split hopper barges and split hopper barges especially for (contaminated) silt.

Our products are deployed internationally for dredging-, pile driving-, geotechnical research and drilling projects. Many examples are shown on this website, www.baarsbv.com. Would you like a personal explanation or a quotation, free of engagement? Please call us at +31 (0)184 41 55 66 or send an e-mail to rental@baarsbv.com.
